## Model One Speaker

## **Aura Model One Speaker**

Dear Customer,

Welcome to April Music.

Thank you for purchasing the Aura Model One loudspeaker.

The Model One is specially designed for best results with the Aura note CD Completer, April Music's all-in-one music center.

The Model One is compact for easy placement anywhere in your home or office. The affordability of this tiny speaker belies world-class performance that exceeds many larger and more expensive designs. The Model One offers a combination of natural sound, detail, dynamics and impact that seem unlikely coming from such a small speaker.

Like almost all compact mini-monitors, the Model One has limited low-frequency capability. If your preferences include lifelike rock and full-scale symphonic music, you will want to augment the Model One with a high-quality subwoofer operating from 60Hz and below.

For most desktop or bookshelf listening environments, the Model One is ideal alone.

In traditional two-channel audio installations, best results may be obtained by mounting the Model One loudspeakers on sturdy speaker stands whose height puts the tweeters at approximately ear level. Placing the speakers away from side and back walls and other reflective surfaces will improve their ability to create a three-dimensional sonic space.

Recommended amplifier power is 10 Watts to 60 Watts. Listen and be amazed at the musical potential of this small wonder.

## Features

Type : 2 way, bass reflex

Impedance : 4 Ohms

Woofer : 5.25 inch Paper cone + Hemp + Coated
